Hyderabad, India

Objective

Computer Science undergraduate with hands-on experience in Python, Flask, backend development, APIs, and machine learning projects. Skilled in developing scalable, secure, and data-driven applications, with strong problem-solving abilities and a passion for software engineering.

Education

Sphoorthy Engineering College Hyderabad – B.Tech in Computer Science and Engineering
CGPA: 7.6 2022 – 2026

Narayana Junior College, Hyderabad – MPC Stream
Percentage: 80% 2020 – 2022

Skills

Primary Language: Python, SQL
Core CS: DBMS, OS, Computer Networks
Data Analysis: Numpy, Microsoft Excel
Data Visualization: Power BI
Tools: Git, vscode
Soft Skills: Adaptability, Team Collaboration, Teamwork.

Projects

Automatic Resume Maker

- Developed a web application that generated 100+ ATS-compliant resumes using HTML, CSS, and JavaScript.
- Improved resume generation efficiency to showcase their skills.
- Enhanced recruiter trust through real-time applicant skill matching.

Detection and Stage Prediction of Kidney Disease Using Machine Learning

- Build a Flask-based CKD prediction web application with login, registration, report upload and result visualization..
- Used machine learning with Random forest to predict CKD stages.
- Enabled PDF/image report parsing, multi-report analysis, and Clinical warning generation using JavaScript, HTML.
- Trained and deployed a Random Forest model for CKD Classification and Stage Prediction with high Accuracy.

Certifications

- Java (Basics) – HackerRank
- Accenture Developer Job Simulation – Forage
- Salesforce Developer course – Yuva Foundation
- Introduction to Artificial Intelligence – IBM SkillsBuild
- Java Full Stack – Wipro

Internships

- Gained practical experience in process mining through a Celonis virtual internship via Eduskills.
- Strengthened knowledge in Cybersecurity during a Zscaler virtual internship.
